

# YOUANMI GOLD PROJECT

## Highlights

- Joint-Venture with Venus Metals Corporation Limited (VMC)
- Indicated and Inferred JORC2012 Gold Resources:  
12.4Mt @ 2.97g/t Au for 1.19 million ounces
- Strong production history of 670,000 ounces at 5.4g/t Au
- Operations closed in 1997 driven by weak gold prices of A\$400/oz – A\$450/oz
- Very limited exploration over past 10 years
- Undeveloped Resources from surface
- Tenements surround the high-grade Penny-West gold mine
- Strong exploration upside and discovery potential with extensive tenure covering 637km<sup>2</sup> along the Youanmi Greenstone Belt
- Several other near-surface gold targets within 5km from the mill
- Advanced near-mine targets within close proximity of the existing mine infrastructure
- Immediate extensions of the Youanmi open pit deposits likely
- Drill ready targets along known mineralised trends

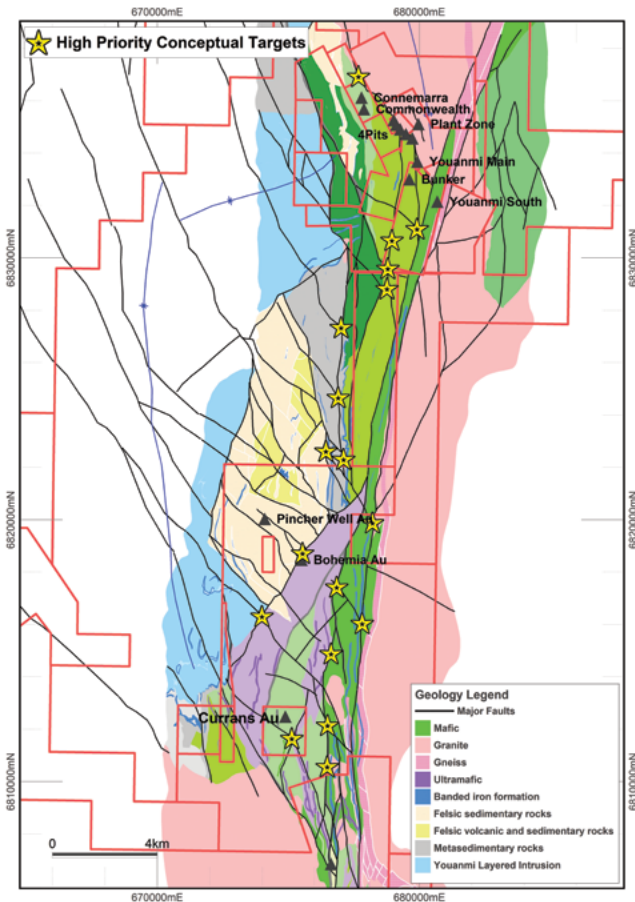

# ROX RESOURCES

## Youanmi 2012 JORC Resource

| Near Surface |            |              |             |                |
|--------------|------------|--------------|-------------|----------------|
|              | COG (g/t)  | Tonnes       | Au (g/t)    | Gold (oz)      |
| Indicated    | 0.5        | 4.72         | 1.76        | 266,200        |
| Inferred     | 0.5        | 5.36         | 1.55        | 266,500        |
| <b>TOTAL</b> | <b>0.5</b> | <b>10.07</b> | <b>1.65</b> | <b>532,700</b> |

| Youanmi Deeps |           |              |            |                |
|---------------|-----------|--------------|------------|----------------|
|               | COG (g/t) | Tonnes       | Au (g/t)   | Gold (oz)      |
| Indicated     | 4         | 0.808        | 8.1        | 210,200        |
| Inferred      | 4         | 1.605        | 8.7        | 447,700        |
| <b>TOTAL</b>  | <b>4</b>  | <b>2.413</b> | <b>8.5</b> | <b>657,900</b> |

## Key Targets

### Airstrip Zone

- Significant gold-in-laterite at surface (7m @ 4.5g/t Au from 3m)
- Resource defined over 130m strike - open along strike and at depth

### Plant Zone

- Undeveloped Indicated and Inferred Resource (JORC 2012) 2.46Mt @ 0.93g/t Au for 74Koz
- High grade near-surface mineralised envelopes extends over a strike length of at least 1,200m
- Drill tested to only 100m below surface - Depth extensions likely

### Commonwealth-Connemara Deposits

- Undeveloped Indicated and Inferred Resource (JORC 2012) 570Kt @ 1.7g/t Au for 31Koz
- Gold mineralisation defined over 600m strike length
- Drill tested to only 120m depth - open at depth and along strike

### Youanmi Main Pit

- Multiple follow-up targets located at depth and within mafic hanging-wall e.g. 10m @ 5.8g/t Au from 61m - not followed up

### Bunker Pit

- High grade unmined gold intersected in historical drilling e.g. 29m @ 12.9g/t Au from 51m
- Drill tested to only 100m below surface
